## . Beskrivning av kursupplägget.

### **Beskrivning av kursupplägget.**

The course was an introduction to ordinary differential equations, in particular existence/uniqueness of solutions, linear ODEs, boundary value problems and autonomous systems

---

## . Kursens fördelar, beakta studenternas uppfattning i kursutvärderingar.

### **Kursens fördelar, beakta studenternas uppfattning i kursutvärderingar.**

I found the literature suitable for the course and liked the span of its topics. From the course evaluations the students seemed happy with the style of the lectures and the overall course.

---

## . Kursens nackdelar, beakta studenternas uppfattning i kursutvärderingar.

### **Kursens nackdelar, beakta studenternas uppfattning i kursutvärderingar.**

In my opinion having both a written and an oral exam as well as a theory/numerical project is perhaps a bit much.

---

One student complained that the course book was not available in the library.

---

## . Slutsatser samt förslag till förbättringar.

### **Slutsatser samt förslag till förbättringar.**

I am generally happy with how the course went and with the outcome in the exams. If I were to give it again I would consider simplifying the evaluation.
