. Beskrivning av kursupplägget.

Beskrivning av kursupplägget.

This is a mathematics course for economist. It covers the math necessary to understand financial model. From 1-variable optimizations to Lagrange multiplier and linear algebra.

. Kursens fördelar, beakta studenternas uppfattning i kursutvärderingar.

Kursens fördelar, beakta studenternas uppfattning i kursutvärderingar.

Grasp of the material will be fundamental to anyone who wants to work in finance.

. Kursens nackdelar, beakta studenternas uppfattning i kursutvärderingar.

Kursens nackdelar, beakta studenternas uppfattning i kursutvärderingar.

The pace is too fast and the material to cover is too vast. Students arrive to this course after 2 years from high school education (in the best case scenario) and they have forgotten most of the high school math this course build upon. Some students have much trouble adding rational numbers and simplify fractions of algebraic expression.

. Slutsatser samt förslag till förbättringar.

Slutsatser samt förslag till förbättringar.

Introduce a refreshing up course for math to be taken before this. Focus the content of the course on topics that are relevant to the study program leaving the deepest topics for a later coverage
